About This Game

personal tragedy.

These pockets of dissonant clarity are a vain effort to find beauty, poetry and reason in one's bleakest and most desperate moments.

Emporium is a small game lasting roughly 30 to 45 minutes. It has a minimal approach to game play, focusing on visuals and

audio to build a visceral experience with sporadic dialogue choices leading the narrative.

Dage ne vzdrachnyl. Feels more like an emulation than a port, not picking up fight-stick, hitting esc outright closes the game regardless of menu.

More a curio item for fans of the series. Wouldn't recommend if you just want to play a fighting game.. Sakura Magical Girls is a lot like the other Sakura Titles in a few ways. The Art and the lighthearted Story and also the short Playtime are all typical. In this Title, the Story however isn't like a lighthearted Romance or Fantasy Story, but a stupid and not even interesting Mess. If you think about a Story with Magical Girls, there are a lot of ways you can create a maybe not original, but at least amusing Story. This Game however has just a plain boring Story and Writing. It just feels like they only wrote the Story to be able to sell the lewd Art and make a few easy bucks.

If you only want a Game that gives you a few fappable Pictures this will probably be okay for you, but for 10\$ that is just a sad excuse. Don't buy this unless maybe if you can get it for like 2\$ and just for fun since the Art is pretty good and it will at least be better than doing nothing if you don't have anything else.

Overall Score: 4.4/10

Check out my Curator Page: <https://store.steampowered.com/curator/34401214/>. Na to že stojí poměrně málo, tak mě to tak na 10-15 minut vždy zabaví... absolute \u2665\u2665\u2665\u2665\u2665\u2665t game, worth about 15 bucks. If you play on hard or pro it's just tackling the other team for 20 minutes and when you get it they just steal it back. so\u2665\u2665\u2665\u2665\u2665\u2665 wasted 60 bucks on this. when you make a break and try to pass to one of your players it just goes over the sideline. When you kick the ball and try to gain territory the other team just kicks it back and there players are next to you when you catch it clearly offside but it's aloud to play on then they steal it and score. forward passes are so \u2665\u2665\u2665\u2665ed up they throw it like 10m forward. im not joking. I want a refund and my 20 hours back. DO NOT BUY THIS GAME. it's dead rising 2 but with frank west

oh and also frank is a level beyond thicc incapable of being described with the limited peasantry known as "words" so that's cool. so far this game is really buggy as all early access games, i feel like it could be a very good game but needs lots of work!. I never thought I'd get into a text-based game.

Turns out, it's worth much more than 5 bucks.

One request, or maybe I'm just missing it..

Is there a way to increase text size? And if not, that would be a great feature.

EDIT: Text resize was a right-click away. Thanks!. Draw a Stick man Epic 2 is a waste of money put it now to £1

why are there zombies. copy cat of many games.. Sacra Terra: Angelic Night is a HOG that sticks to the tried and tested supernatural theme that the genre is addicted to. You wake up in a hospital bed to find the complex you are in has been taken over by demons based on the seven deadly sins, and with the help of the murdered daughter of the administrator who now just happens to be an angel, you have to defeat the demons one by one.

The Good.

The story is pretty strong and keeps you interested.

The cutscenes are excellent, and there are lots of them.

The visual style and graphics are high definition and amongst the best for the genre.

The soundtrack and audio are perfect and don't distract.

There's a bonus chapter (although it doesn't add much to the story and feels tacked on)

The bonus chapter is 90% new locations, HO scenes and puzzles. Only the first two rooms are reused.

The game is very cheap and has trading cards.

The map is detailed and there are a lot of locations to visit.

It's not too short or too long.

The Bad.

There's no fast travel. The map will tell you where there are actions that need to be completed, but you need to manually travel there .. and that can mean traveling through up to eight scenes, and then having to travel back.

The story is very good, but a lot of the details aren't revealed through the gameplay, as they only appear in your journal. For example, at the very end of the game, I killed the final demon with an object, but didn't know why that object was fatal to them, checking the journal explained why.

The puzzles are on the easy side.

There are a lot of HO scenes (bordering on too many) and a lot of those scenes are reused multiple times. I really don't like when I'm close to completing a task or puzzle and then the last object or piece magically shows up in a HO scene that has appeared in a location you have been through multiple times, and this game does it a lot.

Overall, I think this is a very strong HOG. It's nothing you haven't seen before, but it does it well. Considering the price, I have no hesitation in recommending it for the four or more hours it will take to complete.. A great game with a lot of differently themed levels and interesting items and other objects such as the cannon and some enemies. It makes a lot of fun. I also like that you really have to speedrun the levels in order to proceed into the next world. You always have to complete a world in a specific time in order to unlock the next world which means you can't just go the easy way and move forward slowly.

I also really like the music! It's very joyful and fits well to the gameplay!. unless you have a steering wheel and gas and brake this game is definitely no worth getting. If you like games about the Civil War in the US, then this game is not for you. If you like turned-based strategic games, like those that Paradox does, then this game is not for you. If you like sims of naval actions, as in Total War, then this game is again not for you.

Buy this game only if you want to play a strategy and simulator of the Civil War at sea. In this role, the game reveals all its strengths. But do not demand much from her. It is deep enough and interesting for its price. And to make it clear that the game is very cheap, I will give an example of the prices of other games of this genre: Distant Guns \$ 49.99, Jutland \$ 49.99, War in the Pacific (Matrix Games) \$89 ...

This game is a special category. Once upon a time I played similar games about sailing ships (Age of Sail Series). Then this genre died.

I consider myself an "old school" player. I remember the times when we played drums with desktop friends. Yes it was fun, but very long. Now all the boring or controversial moments are taken over by the computer. And I like it. For me, the "Clad in Iron: Gulf of Mexico 1864" - this is a good game.. This has so much potential. It really will be an incredible experience once the performance issues are worked out. If you have a gtx 970 you will not get a smooth frame rate. I'm looking forward to the new update which supposedly improves the performance. If it ran smooth I could see myself getting lost in here for hours on a regular basis. Keep up the good work! Don't let this one die!. The game is alright for a F2P title. Some servers lag too much however, even with pings as low as 40.
